

# HOMEMAKERS' OPINIONS ABOUT FIBERS IN SELECTED HOUSEHOLD ITEMS: A Nationwide Survey

U.S. Department of Agriculture • Statistical Reporting Service

RETURN TO GOV. DOCS. CLERK

## PREFACE

This report concerns homemakers' attitudes toward fibers in selected household products. It is one of a group of studies conducted by the Special Surveys Branch, Standards and Research Division, Statistical Reporting Service (SRS), U.S. Department of Agriculture (USDA), to determine consumer reactions to agricultural products. The study was designed to provide the cotton and wool industries and USDA with guidelines for product research and improvement based on expressed consumer needs.

The study was conducted under the general direction of Margaret Weidenhamer, Chief, Special Surveys Branch, SRS. Advice was provided in the planning stage by subject matter specialists in USDA, the National Cotton Council of America, and The Wool Bureau, Inc. National Analysts, Inc., Philadelphia, Pa., under contract with USDA, collected the data.

Use of trade names in this publication is for identification only and does not imply endorsement by the U.S. Department of Agriculture.

## HIGHLIGHTS

When homemakers shop for household textile items, durability and ease of care are their chief considerations, according to a nationwide consumer survey conducted by the U.S. Department of Agriculture in the fall of 1969. Items focused on in the survey were sheets, blankets, room-size rugs, tablecloths, bedspreads, scatter rugs, draperies, curtains, and yard goods for home sewing.

### Sheets

All cotton sheets were used in a majority of the households in the 12 months prior to the interview. About half the respondents said they had acquired new sheets in the past year, mainly by actual purchase rather than as gifts. A majority of those obtaining sheets during this time acquired three or more. Homemakers considered ease of care in a sheet more important than "that it be made of a certain fiber," judging by the higher ratings given durable press finish, regardless of fiber, and the fact that few respondents said they sent their sheets to a commercial laundry.

### Blankets

Almost every homemaker reported having used some type of blanket in the past year--mainly blankets of all cotton or all wool. "Can be washed," "does not shrink," and "lasts a long time" were foremost in the respondents' minds when purchasing blankets. When rating the three major blanket fibers--all wool, all cotton, and all synthetic--homemakers gave wool the lowest rating. Although wool was considered durable, it was criticized by some homemakers because it "must not be washed" and it "shrinks."

### Bedspreads

Most homemakers reported using bedspreads in the past year. Of the three types--chenille, tailored, and woven--chenille was most likely to be used. Cotton was mentioned as the fiber preferred and used most frequently, chiefly because it was easy to care for and durable. However, cotton chenille bedspreads were criticized by some because they formed lint.

### Rugs

#### Area Rugs

Area or room-size rugs were used in about half the homes surveyed. These rugs, principally all wool, all nylon, or all acrylic, were used mainly in the living room and bedroom. All acrylic, all nylon, and all wool were the preferred fibers. They were said to "look good for a long time" and to be "easy to care for on a day-to-day basis." These characteristics were also major purchase considerations in addition to "ease of stain removal."

## Scatter Rugs

Over three-fourths of the homemakers reported using scatter rugs in the home. Although these rugs were used by a majority of the homemakers in virtually every major room in the home except the dining room, over two-thirds of the respondents said they had used them in the bathroom. Fiber ratings in scatter rugs varied by their location--all acrylic received the highest rating for bedrooms and all cotton for bathrooms. Cotton scatter rugs, cited for their care and laundering characteristics, were criticized for their tendency to slide and wear out quickly.

## Window Hangings

Draperies were used by a majority of the homemakers in the living room or bedroom. Curtains were more popular in kitchens and bedrooms.

Fiberglas was reported used and preferred by the highest proportion of homemakers for living room draperies. Nevertheless, about equal percentages of homemakers reported having used all nylon, all cotton, and all Fiberglas curtains in the living room in the past year.

When homemakers were questioned about the use of cotton curtains and/or draperies, the principal advantages and disadvantages reported were related to care and durability.

## Tablecloths

A large majority of the respondents said they had used cloth tablecloths in the past year. Cotton (53 percent) and linen (22 percent) were the only fibers mentioned with any degree of frequency. Very few respondents (16 percent) reported using tablecloths with a special finish. When questioned, however, on their relative preference for these finishes, homemakers gave both durable press and stain resistance very high ratings.

The preference for special finishes was validated when respondents were asked to select those characteristics considered important in purchasing tablecloths: "easy to remove stains" and "looks good without ironing" were selected by better than half the homemakers.

## Yard Goods

Almost half (45 percent) of the homemakers interviewed had purchased yard goods in the past year, primarily to be made into clothing for children 6-8 years of age and adults. Cotton was the leading fabric reported purchased, regardless of intended end use.

Summary table 1.--Homemakers' usage patterns, ratings, and purchase criteria of household textiles

End use	Percentage using	Major fiber and type used	Fibers and types rated highest	Purchase criteria
Sheets	100	All cotton regular	All cotton	Lasts a long time Easy to wash Looks good without ironing Good value for the money
Blankets	98	All cotton regular All wool regular	All synthetic regular	Can be washed Does not shrink Lasts a long time Good value for the money
Bedspreads	96	Cotton chenille	Cotton durable press Cotton chenille	-- --
Room-size rugs	50	All wool	Living Room All acrylic All nylon All wool	Bedroom All acrylic All nylon Living Room - Bedroom Looks good for a long time Easy to care for on a day-to-day basis Easy to remove stains
Scatter rugs	80	--	Bath All cotton All acrylic	Bedroom All acrylic All nylon
Draperies	80	Living Room Fiberglas	Living Room Fiberglas	
Curtains	89	Living Room Nylon Fiberglas Cotton	Living Room Fiberglas Polyester	
Tablecloths	74	Cotton	Linen Cotton Durable press Stain resistant	Easy to remove stains Looks good without ironing Resists staining

Summary table 2.--Homemakers' opinions of major characteristics of fibers and finishes.

End use	Cotton	Polyester and cotton	Durable press cotton and durable press polyester and cotton	Wool	All synthetic
Sheets	Can be bleached Easy to wash Lasts a long time	Easy to wash Looks good without ironing Easy to dry	Looks good without ironing Easy to wash Easy to dry	-- --	-- --
Blankets	Can be washed Good for use all year Can buy it on sale	-- --	-- --	Lasts a long time Shrinks Not good for use all year Must not be washed	Can be washed Good for use all year Colors stay like new Good range of colors
Bedspreads	Easy to wash Lasts a long time	-- --	-- --	-- --	-- --
Room-size rugs	Does not look good for a long time Tends to mat or crush easily Good range of colors Easy to remove stains	-- --	-- --	Looks good for a long time Difficult to remove stains Good range of colors Good value for the money	Easy to re- move stains Easy to care for on a day- to-day basis Looks good for a long time Good range of colors
Scatter rugs	Easy to wash Can be washed Tends to slide				Nylon and acrylic
Draperies	Requires ironing				
Curtains	Can be washed Easy to wash				

HOMEMAKERS' OPINIONS ABOUT FIBERS IN SELECTED HOUSEHOLD ITEMS:  
A NATIONWIDE SURVEY

by

L. Yvonne Clayton  
and  
Lorna R. Sherman 1/

INTRODUCTION

In recent years the use of manmade fibers and blends of manmade and natural fibers in household products has reduced the share previously held by natural fibers in the U.S. market. The major purpose of this study is to provide information on beliefs and attitudes of homemakers toward natural fibers and synthetics as they affect the purchase of specific household products.

The survey reported here was conducted between October and December 1969 among 2,489 homemakers. These homemakers represented a cross section of private households located in both urban and rural areas throughout the 48 contiguous States. Respondents were selected entirely by area probability sampling procedures. The eligible respondent was defined as that person in the household with principal responsibility for the purchase and/or care of household furnishings. This definition permitted some male respondents to be included in the study. For reporting convenience, however, terms such as "homemakers" and "women" are used in this report to refer to all respondents, regardless of sex.

To ensure a satisfactory completion rate a differential callback procedure was employed. Urban households--where initial contact was not made--were revisited at least three times (either during different times of the same day or on different days) and rural households were revisited at least twice. These efforts resulted in an overall completion rate of 75 percent. A complete description of the sampling procedures used and estimates of sampling error for this survey are presented in the appendix.

---

## Areas of Questioning

The textile items included in this study were sheets, blankets, bedspreads, area or room-sized rugs, scatter rugs, draperies and curtains, tablecloths, and yard goods for home sewing. For each of these eight end products, use or nonuse in the past 12 months was ascertained. The desirability of selected fibers in each end product was investigated for all but yard goods. To obtain some indication of the respondent's attitudes toward various fibers, finishes, and types in specific household articles, homemakers were asked to indicate their opinion of each on a five-point scale, even if they had not used the item.

The relative importance of selected criteria in the purchase of sheets, blankets, area rugs, and tablecloths was determined. Women were asked to indicate whether sheets, blankets, and area rugs made of selected fibers and fiber combinations possess these characteristics. The perceived advantages and disadvantages of specific fibers were probed for bedspreads, scatter rugs, draperies and curtains, and tablecloths. In addition to the above, respondents were asked if they had acquired any sheets in the past 12 months and how their sheets were usually laundered. Finally, the interviewer determined the fiber, size, and price of the most recently purchased room-size rugs. The questionnaire used in this study is reproduced in the appendix.

## Interpretation of Data

This survey relates to findings derived from a sample of the population, rather than a census of the total population. As such, it is subject to possible sample variations. The size of each subpopulation, sampling error for four items, and approximate confidence limits for other percentages generated by this study are shown in the appendix.

The findings are presented as summaries of the statements made by the homemakers and are subject to any errors they made in reporting their beliefs and attitudes. It is especially important to keep this factor in mind in analyzing data on fiber experience and preference, since difficulties with fiber identification have some influence on the validity of respondent's statements. Inadvertent misstatements by respondents may occur because of oversights, lack of information, or confusion about fiber content. There are many kinds of fibers and fiber combinations on the market, and problems of identification may arise from the use of descriptive or brand names for a product. Furthermore, household items made of such mixtures as polyester and cotton, for example, may have been identified as either polyester or cotton. There may have been confusion among such fibers as rayon, acetate, polyester, and nylon also. However, since this study was not intended to provide estimates of fiber consumption but rather to collect data about the attitudes and impressions homemakers hold toward the various fibers, the statements made were accepted as given.

Since respondents were also describing from memory the number of items and the fibers they owned, made, or bought, some forgetting, overstatement, or misunderstanding may have crept into the responses. No inventory of

household furnishings was conducted.

Throughout the questionnaire the word "fiber" was used; more familiar terms such as "material" or "fabric" were generally avoided, with the exception of questions on home sewing. Care was taken in the section on sheets to point out to the homemaker that the terms "muslin" and "percale" refer to weave and not to fiber. Throughout this report, "rayon" is occasionally used for the category "rayon/acetate."

### Text Tabulations

Summary tabulations are included throughout the text. Some percentages have been presented which do not add to 100, and some subcategories do not equal the percentage for an entire category. This occurs because only highlights are presented in such tables. Multiple responses account for tables adding to more than 100 percent and for subcategories adding to more than percentages shown for an entire category. All percentages are based on the total sample of 2,489, except as noted.

The proportions of respondents who rated a product as either "1--not a very good choice for me" or "5--a very good choice for me" are shown in the text. This represents both ends of the 5-point scale used to show the acceptability of selected fibers or selected characteristics for a given end product, if respondents were buying a specific end product at that time.

Respondents were asked to indicate total annual household income before taxes. Households were then classified in approximately equal-sized groups as follows:

<u>Group</u>	<u>Income</u>	<u>Households reporting</u>
Lower	Under \$6,000	822
Middle	\$6,000-\$9,999	731
Upper	\$10,000 or more	722

A total of 214 respondents did not answer the income question.

Respondents were also classified according to age, education, and size of household. Throughout the report, the terms "family" and "household" are used interchangeably.

The discussion in the text focuses on those results that appeared to contribute most to an understanding of homemakers' opinions about the subject areas covered in this study. Therefore, responses to a few questions have not been included in the text or appendix tables. (The references in parentheses are to the numbered questions in the questionnaire and to the appendix tables which summarize answers to the questionnaire.)

Data are discussed with reference to demographic characteristics when results are of particular interest. For more comprehensive coverage, the reader is directed to the appendix tables. Findings by background characteristics are solely descriptive in nature. The reader is cautioned against assigning any cause-and-effect relationship from these results. Highly interrelated personal characteristics, such as age, education, and income levels, are shown separately. Combining them would have resulted in an excessive number of separate groups with too few respondents in each. However, tables showing the interrelationship among characteristics are shown in the appendix.

## SHEETS

### Usage: Fibers and Types

Forty-six percent of the respondents reported they had acquired new sheets in the preceding year. Of these, more than half indicated they had obtained three or more during this time. A majority said they had actually purchased the sheets; only a few indicated they were received as gifts. Respondents who had acquired sheets in the past year were more likely to be younger, better educated, have larger families composed of children and adults, and have higher family incomes. About a third (34 percent) of all the respondents said that their last acquisition of sheets was 1 to 3 years prior to the interview, while about a fifth (19 percent) indicated that it had been over 3 years.

Better than 8 in 10 homemakers said they had used cotton sheets in the year preceding the interview, with a majority indicating the use of regular all cotton sheets; only about 1 in 10 said they had used durable press all cotton sheets. The use of polyester and cotton blend durable press sheets was reported by only 14 percent; an even smaller percentage (10 percent) indicated using regular polyester and cotton (not durable press).

The use of durable press sheets was more characteristic of younger, better educated, more urbanized homemakers as well as those with larger families. Older homemakers and those living in the South were more likely to have used cotton sheets in their homes in the previous 12 months.

(Questions 1-9)

### Fiber and Finish Ratings

Despite far more widespread ownership of regular all cotton sheets, two other types of sheets--durable press all cotton and durable press cotton with polyester--rated on a par with all cotton. Better than 4 in 10 homemakers gave a rating of "5--a very good choice for me" to three of the four types of sheets being considered. They were all cotton, durable press all cotton, and durable press cotton with polyester. About half as many respondents gave this rating to the fourth type, regular polyester and cotton blend sheets. However, about 1 in 10 homemakers gave all four sheets a rating of "1--not a very good choice for me."

	<u>Polyester and cotton</u>	<u>All cotton</u>	<u>Durable press polyester and cotton</u>	<u>Durable press cotton</u>
<u>Ratings</u>	<u>Percent</u>			
5	27	47	45	42
1	12	11	10	8

(Question 10)

### Major Factors in Purchasing Sheets

Respondents were presented with a card listing 15 attributes which might be used to characterize sheets and asked to select those ideas which would be most important to them if they were buying sheets. They were encouraged to select as many as they felt important. The intent of this question was to gain insight into factors which influence the purchase of sheets in general.

Durability was selected by the largest percentage of homemakers as an important factor when purchasing sheets. "Easy to wash," "looks good without ironing," and "good value for the money" were selected by nearly equal percentages of homemakers and ranked second to durability in importance.

Relatively few respondents said that a certain fiber or weave was an important consideration when purchasing sheets.

The following tabulation lists the characteristics selected by the homemakers as most important in the purchase of sheets:

	<u>Percent</u>
Lasts a long time	63
Easy to wash	57
Looks good without ironing	55
Good value for the money	55
Keeps its whiteness or color for a long time	48
Can be bleached	33
Easy to remove stains	31
Smooth to the touch	29
Can buy it on sale	28
Easy to dry	27
Made of a certain fiber: cotton, etc.	18
A certain weave: muslin or percale	17
Good range of colors or prints	16
Does not "pill"	13
Absorbent	5

(Question 11)

## Characteristics of Specific Fibers and Finishes in Sheets

Having indicated the characteristics they considered most important in purchasing sheets, respondents were then presented with a card (Card D) which listed 13 pairs of attributes that might apply to specific kinds of sheets. Each pair reflected both the positive and negative aspect of that attribute. Respondents were asked to select from this list those phrases that described their opinions about the four selected fiber and finish combinations: all cotton and polyester-cotton blend, with and without a durable press finish. It was anticipated that such a procedure would give further insight into the factors that might influence a homemaker's purchase of specific sheets.

All cotton sheets were mainly characterized as durable, easy to wash, and bleachable. Other frequently mentioned attributes of regular all cotton, which were generally not shared by the other kinds of sheets, were "can buy on sale," "good value for the money," "keeps its whiteness," and "easy to remove stains." The only negative attribute that appeared with any degree of frequency was that all cotton does not look good without ironing.

Of the homemakers interviewed about 1 in 4 said they did not know or had no opinion about sheets of polyester and cotton blends and those with a durable press finish. When respondents did venture an opinion about these sheets, they were more likely to characterize them as "looks good without ironing" (a characteristic mainly attributed to durable press), "easy to wash," "easy to dry," "smooth to the touch," and "lasts a long time."

The following tabulation shows the percentage of all women selecting positive and negative characteristics of the four kinds of sheets discussed:

	<u>Regular</u>		<u>Durable Press</u>	
	Polyester-- cotton blend	All cotton	Polyester-- cotton blend	All cotton
	<u>Percent</u>			
Lasts a long time	34	60	27	32
Wears out rather quickly	5	6	6	5
Easy to wash	50	63	46	47
Not easy to wash	1	2	1	1
Looks good without ironing	46	14	60	54
Does not look good without ironing	7	38	2	5
Good value for the money	21	43	20	23
Not good value for the money	4	2	4	3
Keeps whiteness/color long time	21	40	17	21
Does not keep whiteness/color long time	9	6	8	5

	<u>Regular</u>		<u>Durable Press</u>	
	<u>Polyester--</u>		<u>Polyester--</u>	
	<u>cotton</u>	<u>All</u>	<u>cotton</u>	<u>All</u>
	<u>blend</u>	<u>cotton</u>	<u>blend</u>	<u>cotton</u>
	<u>-----Percent-----</u>			
Can be bleached	11	64	8	17
Must not be bleached	16	1	18	10
Easy to remove stains	15	38	12	16
Difficult to remove stains	9	7	11	8
Smooth to the touch	31	21	37	31
Rough to the touch	1	14	1	3
Can buy on sale	19	47	17	19
Cannot buy on sale	3	*	4	4
Easy to dry	42	28	43	39
Not easy to dry	1	12	1	2
Good range of colors/prints	21	28	22	22
Not good range of colors/prints	1	2	1	*
Does not "pill"	11	19	11	12
"Pills"	5	3	4	3
Absorbent	7	23	6	11
Not absorbent	7	1	9	6
Don't know, no opinion	23	2	24	24
Total favorable mentions	329	488	326	344
Total unfavorable mentions	69	94	70	55

\* Less than 1 percent

(Questions 12, 13, 14 and 15)

#### Laundering Procedures

The importance of care consideration in the selection of sheets is underscored by the fact that relatively few homemakers said that they sent their sheets to a commercial laundry. The vast majority washed their own sheets, either at home or in a laundermat.

Drying methods, however, varied considerably more. Over a third of the respondents said that their sheets "dry on the clothesline;" about a fourth machine dry them; a like proportion indicated that either they machine dry their sheets or dry them on the clothesline, depending on the weather.

(Question 16)

## BLANKETS

### Usage: Fibers and Types

Almost every homemaker reported using blankets in the past year. Use of more than one type (thermal, electric, and regular) was not uncommon. A large majority of all segments of the population reported the use of regular blankets in the past year--principally, all cotton, all wool, and all synthetic.

Much smaller proportions indicated that they had used thermal or electric blankets. All synthetic and all cotton were the fibers reported most frequently. However, only 5 percent of the respondents reported having used all cotton electric blankets in the past year. The use of thermal and electric blankets was reported by somewhat larger percentages of the better educated homemakers and those with larger family incomes. Younger homemakers and those with large families were more likely to have used thermal blankets; conversely, larger percentages of older homemakers and those with smaller families indicated the use of electric blankets in the past year.

The following tabulation shows the percentage of women reporting the use of blankets by major fibers and types:

	<u>Percent</u>
Used blankets of some kind	98
Used regular blankets	89
All cotton	44
All wool	40
All synthetic	33
Used thermal blankets	38
All synthetic	16
All cotton	13
Used electric blankets	28
All synthetic	14
All cotton	5
All wool	4
Did not use	2

(Questions 22 and 23)

### Fiber and Finish Ratings

Homemakers were asked to rate three different fibers (all wool, all cotton, and all synthetic) and three different types of blankets (regular, electric, and thermal). About one-fourth gave a rating of "5--a very good choice for me" to all three fibers. However, the attitudes of many homemakers toward these fibers was more realistically represented by the proportion who rated the fibers "1--not a very good choice for me." Less than one-fourth gave this rating to all cotton and all synthetic, while almost one-half indicated that wool was "not a very good choice" for them. Ratings of all three types of

blankets were somewhat similar, with electric blankets being the least popular.

	<u>Synthetic</u>	<u>Cotton</u>	<u>Wool</u>	<u>Regular</u>	<u>Thermal</u>	<u>Electric</u>
<u>Rating</u>	<u>Percent</u>					
5	27	24	25	36	35	27
1	17	23	43	10	21	43

(Question 17)

#### Major Factors in Blanket Purchases

As with sheets, homemakers were presented with a card of selected attributes and asked to indicate those they considered most important in purchasing blankets. Washability was the chief consideration for most respondents. Over half the homemakers were also concerned with whether the blanket would shrink and if it would last a long time. Good value for the money was important to about half the respondents; however, only about one-fifth said "can buy it on sale" was a major factor.

Performance is apparently more important to blanket purchasers than fiber content. Only about one-fourth of those interviewed said that the fact that a blanket is "made of a certain fiber" was a major purchase consideration.

The attributes and their frequency of mention are:

	<u>Percent</u>
Can be washed	84
Does not shrink	68
Lasts a long time	60
Good value for the money	50
Colors stay like new	43
Good for use all year round	39
Does not stretch	37
Does not "pill"	34
Made of a certain fiber: cotton, etc.	28
Easy to remove stains	26
Does not burn easily	22
Can buy it on sale	21
Good range of colors	20

(Question 18)

### Characteristics of Specific Fibers in Blankets

Synthetic blankets, characterized mainly as washable, were not as familiar to the respondents as cotton and wool. One-fifth of the respondents did not select any of the listed positive or negative phrases as indicative of their opinions of synthetic blankets. Cotton, considered washable by a vast majority of the homemakers, was also characterized as "good for use all year," "can buy it on sale," "easy to remove stains," and "does not shrink." Wool, although characterized as durable more often than cotton or synthetic blankets, was more likely to be criticized because it "must not be washed," "shrinks," and is "not good for use all year round."

The following tabulation shows the percentages of women selecting positive and negative characteristics describing each of the three kinds of blankets discussed:

	<u>Wool</u>	<u>Cotton</u>	<u>Synthetic</u>
	<u>-----Percent-----</u>		
Can be washed	26	85	61
Must not be washed	44	*	3
Does not shrink	11	37	33
Shrinks	52	14	6
Lasts a long time	58	34	34
Wears out rather quickly	2	19	6
Good value for the money	32	33	30
Not good value for the money	7	7	4
Colors stay like new	33	25	36
Colors do not stay like new	5	13	3
Good for use all year round	9	46	38
Not good for use all year round	45	12	5
Does not stretch	19	23	22
Stretches	7	9	7
Does not "pill"	13	14	12
"Pills"	22	16	17
Easy to remove stains	7	37	16
Difficult to remove stains	27	3	10
Does not burn easily	10	9	9
Burns easily	13	9	11
Can buy it on sale	20	39	26
Cannot buy it on sale	4	1	1

	<u>Wool</u>	<u>Cotton</u>	<u>Synthetic</u>
	<u>-----Percent-----</u>		
Good range of colors	28	31	35
Not a good range of colors	2	2	1
Don't know, no opinion	4	5	20
Total favorable mentions	266	413	352
Total unfavorable mentions	230	105	74
* Less than 1 percent			(Questions 19, 20, and 21)

## BEDSPREADS

### Usage: Fibers and Types

As with blankets, nearly every homemaker (96 percent) reported the use of some type of bedspread in the year prior to the interview. The introduction to this section of the questionnaire read: "The bedspread industry separates bedspreads into three types. In addition to the tufted or chenille bedspread, a second type is the woven. This type is made of material woven mainly for bedspreads. It is generally heavier and the pattern or color is woven through, not printed on. It has almost the same pattern on both sides except the colors are reversed. All other bedspreads are called tailored. These are made of material that could be used for other items. They may be quilted, flat or ruffled, fitted or not." The largest majority (69 percent) said they had used chenille spreads. The use of tailored spreads was reported by 47 percent; least frequently mentioned were woven bedspreads (35 percent). For all three types of bedspreads the most frequently mentioned fiber was cotton. Chenille bedspreads were used by higher proportions of respondents who were less well educated and those with lower family incomes. Tailored and woven spreads, on the other hand, were used by higher proportions of the better educated homemakers and those with higher incomes.

The following tabulation summarizes reported usage of bedspreads by types and major fibers.

	<u>Percent</u>
Used bedspreads of some kind	96
Used chenille bedspreads	69
Cotton	63
Used tailored bedspreads	47
Cotton	24
Rayon/acetate	8
Used woven bedspreads	35
Cotton	27
	(Questions 24-30)

## Perceived Advantages and Disadvantages of Cotton Bedspreads

Cotton, regardless of type of bedspread, was the only fiber whose use in the 12 months prior to the interview was indicated by a high proportion of respondents. Perceived advantages and disadvantages volunteered by respondents who had used these bedspreads revealed that ease of care, durability, and appearance were important considerations in making cotton bedspreads widely acceptable. Regardless of style, cotton bedspreads were valued chiefly because they can be washed easily and last a long time.

Cotton chenille was the only type of bedspread which generated a significant disadvantage. Almost 4 in 10 users said that cotton chenille bedspreads formed lint; about the same proportion, however, said these spreads had no disadvantages.

It should be noted that questions about advantages and disadvantages were asked only of those who said they had used a specific fiber and type of bedspread in the past year. In the appendix table, however, percentages were based upon the total number of all respondents.

The following tabulation summarizes the major advantages and disadvantages cited by users for the three types of cotton bedspreads:

	<u>Cotton chenille</u>	<u>Cotton woven</u>	<u>Cotton tailored</u>
	<u>-----Percent 1/-----</u>		
<u>Advantages</u>			
Easy to wash	35	26	23
Lasts a long time	28	30	19
Little or no ironing	22	19	12
Can be washed	21	22	25
Looks good after laundering	19	14	7
Easy to dry	14	8	8
Colors stay like new	13	21	12
Attractive, pretty	13	16	21
No advantages	2	1	3
<u>Disadvantages</u>			
Lints	36	2	1
No disadvantages	43	61	50

1/ Percentages are based on total number of respondents who had used that type/fiber bedspread.

(Questions 31 and 32)

### Fiber and Finish Ratings

Homemakers were presented with a list of eight different kinds of bedspreads and asked to rate them. They comprised four fibers (polyester and cotton, polyester, cotton, and rayon); three types (chenille, woven, and tailored); and one fabric finish, durable press. All cotton was clearly the most popular fiber, with about half the respondents giving it a rating of "5--a very good choice for me." On the other hand, rayon, the least popular, was rated "1--not a very good choice for me" by similar proportions.

Homemakers' opinions of types of spreads are somewhat less definitive. Although chenille received more negative votes than the other two types, it also was characterized more often as "5--a very good choice for me."

Durable press finish was given a "5" rating by almost half the respondents.

	<u>Polyester and cotton</u>	<u>Polyester</u>	<u>Cotton</u>	<u>Rayon</u>	<u>Chenille</u>	<u>Woven</u>	<u>Tailored</u>	<u>Durable press</u>
<u>Rating</u>	<u>Percent</u>							
5	27	23	51	6	42	31	34	47
1	11	15	9	48	20	15	15	9

(Question 33)

### RUGS

#### Usage: Fibers and Types

Two types of rugs were considered in this study: area or room-size rugs (defined as larger than 4 x 6 feet but not wall-to-wall) and scatter rugs (defined as no larger than 4 x 6).

Scatter rugs were more widely used than area rugs, according to the homemakers interviewed. A large majority (80 percent) said they had used scatter rugs in the past year, while only about half indicated the use of area rugs in their homes during this time. Nearly half the respondents who used area rugs had purchased at least one within the past 3 years, mainly for the living room or bedroom. All wool, all nylon, all acrylic, and all cotton were mentioned, in that order, as the fibers most recently purchased in area rugs. Scatter rugs were used in every major room in the house except the dining room by more than one-third of the homemakers; almost two-thirds indicated they used scatter rugs in their bathrooms.

Homemakers in the Northeast were more likely than those in other regions to have used area rugs and to have purchased a wool one most recently. The use of scatter rugs, while dominant in all segments of the population, was more likely in homes in the West and North Central section of the country.

(Questions 42-45)

(Questions 52,53)

## Fiber and Finish Ratings

### Room-Size Rugs

In purchasing a room-size rug for either the bedroom or living room, the homemakers interviewed said they would be more likely to choose an all acrylic or all nylon rug rather than an all cotton one. How they rated wool depended on whether the rug was intended for the living room or bedroom. All wool was given the highest rating by more than a third of the respondents for use in the living room, but by only a fourth for use in the bedroom. On the negative side, about a third of the homemakers interviewed rated wool "1--not a very good choice for me" for use in the bedroom and about a fourth gave it the same rating for use in the living room.

	<u>Rating</u>	<u>All wool</u>	<u>All acrylic</u>	<u>Cotton</u>	<u>Nylon</u>
		<u>-----Percent-----</u>			
<u>Bedroom</u>	5	26	34	12	32
	1	35	12	42	17
<u>Living room</u>	5	37	34	7	33
	1	28	11	56	19

(Questions 34,35)

### Major Factors in Room-Size Rug Purchases

Whether for use in the living room or the bedroom, the major considerations in purchasing an area rug were appearance over time, ease of care on a day-to-day basis, and ease of stain removal. Homemakers considered durability without loss of initial appearance of great importance in selecting area rugs, particularly for the living room. Ease of care on a day-to-day basis was slightly less important than durability in appearance in the purchase of a living room rug. Both were equally important factors in the purchase of an area bedroom rug, however. A majority of homemakers selected ease of stain removal as an important consideration when purchasing a rug for either the living room or the bedroom.

The following tabulation shows the percentage of homemakers who selected each of the following characteristics as an important purchase consideration when buying area rugs:

	<u>Bedroom</u>	<u>Living Room</u>
	<u>-----Percent-----</u>	
Looks good for a long time	68	73
Easy to care for on a day-to-day basis	68	68
Easy to remove stains	57	68
Does not "fuzz" or shed	51	46
Good value for the money	46	45
Good in homes where there are children	39	41
Does not mat down or crush easily	38	44

Made of a certain fiber: wool, etc.	33	36
Good range of colors	32	36
Does not burn easily	26	27
Little or no static electricity	23	24

(Questions 36 and 37)

### Characteristics of Specific Fibers in Room-Size Rugs

Homemakers' opinions that both acrylic and nylon fibers possess those characteristics which they consider most important in purchasing area rugs appear to account for the higher ratings accorded these fibers. Although wool excelled in durability in appearance, stain removal was considered more difficult with wool than with the synthetic fibers. To a lesser extent, wool was also judged more difficult to care for on a day-to-day basis. The attributes on which acrylic and nylon rated well were mentioned by homemakers as often as durability in appearance when fiber was considered in the selection of an area rug.

The homemaker's attitude toward cotton in area rugs is reflected in the small proportion selecting positive factors to characterize this fiber. Cotton area rugs were criticized most often for crushing or matting down easily and for failing to "look good for a long time." The only positive factors mentioned by as many as one-fourth of the respondents were "easy to remove stains" and "good range of colors." However, about a fifth of the homemakers criticized cotton because of difficulty in removing stains.

The following tabulation shows the percentage of women selecting positive and negative characteristics associated with each of the four rug fibers:

	<u>Acrylic</u>	<u>Nylon</u>	<u>Wool</u>	<u>Cotton</u>
	----- <u>Percent</u> -----			
Looks good for a long time	36	44	52	12
Does not look good for a long time	6	7	8	36
Easy to care for on a day-to-day basis	41	46	30	20
Difficult to care for on a day-to-day basis	4	6	21	24
Easy to remove stains	45	52	15	27
Difficult to remove stains	6	7	41	21
Does not "fuzz" or shed	19	23	21	12
Tends to "fuzz" or shed	10	10	20	19

	<u>Acrylic</u>	<u>Nylon</u>	<u>Wool</u>	<u>Cotton</u>
	<u>-----Percent-----</u>			
Good value for the money	27	33	35	19
Not a good value for the money	3	4	7	19
Good in homes where there are children	33	39	16	20
Not good in homes where there are children	4	6	27	18
Does not mat down or crush easily	20	24	28	6
Tends to mat down or crush easily	8	10	12	30
Good range of colors	36	39	37	28
Not good range of colors	1	1	2	2
Does not burn easily	11	11	12	8
Burns easily	8	13	14	13
Little or no static electricity	11	9	18	22
A lot of static electricity	10	23	12	2
Don't know, no opinion	28	17	10	17
Total favorable mentions	279	320	264	174
Total unfavorable mentions	60	87	164	184

(Questions 38-41)

#### Fibers in Area Rugs Purchased Most Recently

According to the testimony of homemakers interviewed in this study, wool area rugs have decreased in popularity, while cotton and synthetics, especially acrylics, are on the upswing.

The following table summarizes the percentages of homemakers who reported acrylic, nylon, wool, or cotton as the fiber content of the last area rug purchased and still in use when no time restrictions were imposed and when such purchases were confined to the 3 years prior to the interview. In each instance in this tabulation, the base is the number of homemakers who had purchased area rugs for that time period.

	Most recent purchase	Most recent purchases in the 3 years prior to interview
	<u>-----Percent-----</u>	
Wool	29	18
Nylon	20	24
Acrylic	14	24
Cotton	12	17
Number of cases	1,058	511

(Questions 44 and 45)

Price paid per square yard for purchases in the past 3 years ranged from a low of less than \$2.25 to a high of over \$14.25. On the average, cotton was the cheapest and wool the most expensive. The following tabulation summarizes homemakers' responses by fiber and reported cost per square yard for the last area rug purchased in the 3 years prior to the interview:

	<u>Acrylic</u>	<u>Nylon</u>	<u>Wool</u>	<u>Cotton</u>
	<u>-----Number-----</u>			
Less than \$2.25	16	13	9	30
\$2.25 - \$3.25	7	12	8	14
\$3.26 - \$4.00	14	17	3	13
\$4.01 - \$5.00	8	22	6	14
\$5.01 - \$6.50	23	19	7	6
\$6.51 - \$8.25	12	14	12	6
\$8.26 - \$10.25	15	12	10	1
\$10.26 - \$14.25	10	7	9	1
\$14.26 or more	10	-	27	-
Don't know, don't remember	<u>10</u>	<u>6</u>	<u>3</u>	<u>3</u>
Number of rugs	125	122	94	88
	<u>-----Dollars-----</u>			
Reported average price per square yard	6.89	5.20	14.22	3.33

(Questions 45-47)

## Fiber and Finish Ratings

### Scatter Rugs

Synthetic scatter rugs (all acrylic or nylon) were equally acceptable for either bedroom or bathroom, according to homemakers' ratings. Rayon, on the other hand, was generally considered unacceptable for either use.

Homemakers' attitudes toward scatter rugs made of wool or cotton varied according to their intended use. Cotton scatter rugs in the bedroom received about as many negative as positive ratings. However, when intended for the bathroom, cotton scatter rugs led the list; three times as many respondents rated them "5--a very good choice for me" as "1--not a very good choice for me."

On the other hand, wool was rejected as a bathroom scatter rug by an overwhelming majority of the homemakers (80 percent). As a scatter rug in the bedroom, however, wool was more acceptable. About half rejected it, while a fifth gave it their highest rating.

<u>Bedroom</u>					
	<u>Wool</u>	<u>All acrylic</u>	<u>Cotton</u>	<u>Nylon</u>	<u>Rayon</u>
<u>Rating</u>	<u>Percent</u>				
5	20	32	28	31	5
1	48	14	27	18	48
-----					
<u>Bathroom</u>					
	<u>Wool</u>	<u>All acrylic</u>	<u>Cotton</u>	<u>Nylon</u>	<u>Rayon</u>
<u>Rating</u>	<u>Percent</u>				
5	4	31	44	31	5
1	80	17	15	19	50

(Questions 48,49)

## Perceived Advantages and Disadvantages of Cotton Scatter Rugs

All homemakers were asked to cite the advantages and disadvantages of using cotton scatter rugs. Most of the perceived advantages centered around care and laundering characteristics. Major mentions in this area were "easy to wash," "can be washed," and "machine washable." The only other advantages mentioned by as many as 1 in 10 were "lasts a long time," "good range of colors," and "inexpensive." About a third of the homemakers said there were no disadvantages to cotton scatter rugs. The two-thirds who did feel that cotton scatter rugs left something to be desired were mainly concerned with their performance and durability. "Tends to slide," "wears out rather quickly," "doesn't lie flat," and "colors do not stay like new" were the characteristics mentioned most often.

The following tabulation summarizes the major advantages and disadvantages attributed to use of cotton scatter rugs:

<u>Advantages</u>	<u>Percent</u>
Easy to wash	33
Can be washed	25
Machine washable	13
Lasts a long time	13
Inexpensive	12
Good range of colors	10
No advantages	9
<u>Disadvantages</u>	
Tends to slide	19
Wears out rather quickly	12
Doesn't lie flat	12
Colors do not stay like new	11
No disadvantages	31

(Questions 50 and 51)

## WINDOW HANGINGS

### Usage: Fibers and Types

This study focused on the use of two types of window hangings: draperies--"window hangings which are frequently made of heavier materials, and are generally more formal" -- and curtains--"less formal window hangings which are unlined, thinner materials, and often transparent." About 8 in 10 used draperies; 9 in 10 used curtains. Use of draperies increased as income, education, and size of family increased; however, homemakers in the Northeast and those 60 years of age and older were less likely to have used them in the preceding 12 months.

The use of curtains, on the other hand, did not vary appreciably by socioeconomic characteristics. Draperies, although used by a majority of homemakers in the living room or bedroom, could be found in 14 percent of the homemakers' kitchens. However, curtains were a more popular choice for kitchens and bedrooms. The following table shows reported use of draperies and curtains in specific rooms:

	<u>Draperies</u>	<u>Curtains</u>
	<u>-----Percent-----</u>	
Living room	76	34
Bedrooms	55	63
Kitchen	14	80

(Questions 54 and 57)

About 2 in 10 of the homemakers interviewed reported that their living room draperies were made of Fiberglas, while cotton and cotton-rayon blend draperies for the living room were each owned by about 1 in 10. Nylon, Fiberglas, cotton, and polyester were the most frequently reported living room curtains used:

The following tabulation summarizes the fibers reported used in living room draperies and curtains:

	<u>Draperies</u>	<u>Curtains</u>
	<u>-----Percent-----</u>	
Fiberglas	23	6
Cotton	13	6
Cotton and rayon/acetate blend	10	2
Rayon/acetate	5	2
Nylon	2	7
Polyester	1	5

(Questions 55 and 58)

#### Fiber and Finish Ratings

When asked to rate four selected fibers or blends, homemakers clearly indicated that Fiberglas was the most popular fiber for draperies. However, about a fifth gave this fiber the lowest rating as their choice for living room draperies. Rayon and cotton were both rated "1--not a very good choice for me" by about a third of the homemakers. However, cotton received a "5" rating from about a fourth of the respondents, while rayon was accorded this rating by only about 1 in 10.

Fiber and finish ratings for curtains were about the same as for draperies, although the homemaker was given six fibers or blends to rate instead of four--two additional synthetics, nylon and polyester, and cotton and polyester blend instead of cotton and rayon.

#### Draperies

	<u>Cotton</u>	<u>Rayon</u>	<u>Cotton and rayon</u>	<u>Fiberglas</u>
<u>Rating</u>	<u>Percent</u>			
5	24	10	15	47
1	33	37	22	21

(Question 56)

#### Curtains

	<u>Cotton</u>	<u>Rayon</u>	<u>Fiberglas</u>	<u>Nylon</u>	<u>Polyester</u>	<u>Cotton and polyester</u>
<u>Rating</u>	<u>Percent</u>					
5	23	6	45	29	31	20
1	39	45	23	18	11	14

(Question 59)

#### Advantages and Disadvantages in Using Cotton Draperies and Curtains

According to the comments volunteered by homemakers, both the principal advantages and disadvantages of cotton in draperies and curtains were related to care and durability. Cotton was valued for its washability and long-lasting characteristics, but its need for ironing and its tendency to fade were perceived as distinct disadvantages. Homemakers reporting no disadvantages in using cotton--26 percent--outnumbered those who said there were no advantages (19 percent).

The following tabulation summarizes the major advantages and disadvantages in the use of cotton draperies and curtains (reported by 5 percent or more of all respondents).

	<u>Percent</u>
<u>Advantages</u>	
Can be washed	31
Easy to wash	20
Looks good after laundering	7
Lasts a long time	16
Colors stay like new	9
Good range of colors	10
Attractive, pretty	5
Inexpensive	11
No advantages	19
<u>Disadvantages</u>	
Requires ironing	34
Difficult to iron	7
Colors do not stay like new	16
Does not resist stain or soil	7
Wears out rather quickly	6
Shrinks	5
Not attractive, not pretty	8
No disadvantages	26
(Questions 60 and 61)	

#### TABLECLOTHS

##### Usage: Fiber and Finishes

A large majority (74 percent) of the respondents said they had used cloth tablecloths during the previous year. However, 36 percent indicated that they had used them only for special occasions.

Use of cloth tablecloths was reported by smaller proportions of southern homemakers, the less well educated, those with lower family incomes, and homemakers under 30 years of age.

(Questions 62 and 63)

About half of all homemakers (53 percent) reported having used cotton tablecloths in the past year; significantly fewer (22 percent) indicated the use of linen. No other fiber was mentioned by as many as 5 percent of the homemakers.

When asked if any of these tablecloths had special finishes to make them more convenient to use, a relatively small proportion (16 percent) replied in the affirmative. Durable press was the only finish mentioned by as many as 6 percent, with durable press cotton the only fiber-finish combination used by as many as 3 percent of the homemakers.

	<u>Percent</u>
Did not use any tablecloth	26
Did not use any tablecloth with a special finish	58
Used a tablecloth with a special finish	16
Durable press	6
Cotton	3
Cotton and polyester	1
Polyester	1
Wash-and-wear	1
Stain release	3
Soil resistant	1
Other special finish	*
Don't know, no answer to finish	4

---

\* Less than 1 percent

The only advantage of tablecloths with a durable press finish mentioned with any degree of frequency by homemakers who had used them was that they required little or no ironing. However, when questioned about possible disadvantages of tablecloths with this finish, a majority said there were none.

(Questions 64-68)

#### Fiber and Finish Ratings

Fiber preference in tablecloths was much less clearly defined than homemakers' preferences for both durable press and stain resistant finishes in tablecloths. A majority indicated their interest by rating both finishes "5--a very good choice for me."

While both linen and cotton were rated "5" by high proportions of the homemakers, negative ratings of "1" were also given these fibers by significant proportions.

	<u>Linen</u>	<u>Cotton</u>	<u>Polyester</u>	<u>Polyester and cotton</u>	<u>Cotton and rayon</u>	<u>Durable press</u>	<u>Stain and soil resistan</u>
<u>Rating</u>	<u>Percent</u>						
5	40	30	22	21	7	60	73
1	20	15	12	10	29	7	3

(Question 70)

#### Major Factors in Purchasing Tablecloths

To the homemaker, major purchase considerations in buying cloth tablecloth were about the same as when purchasing sheets, blankets, and area rugs. However, the proportion selecting these factors as important varied for each product. "Easy to remove stains," "looks good without ironing," and "resists staining" were mentioned by half or more of the respondents as characteristics they considered important when purchasing cloth tablecloths. Of the factors listed, "made of a certain fiber" was of least concern to the respondents.

	<u>Percent</u>
Easy to remove stains	71
Looks good without ironing	59
Resists staining	50
Lasts a long time	48
Durable press finish	46
Easy to iron	40
Can be dried in a machine	39
Made of certain fiber: cotton, etc.	27

(Question 69)

#### YARD GOODS

Almost half (45 percent) of the respondents had purchased yard goods in the 12 months prior to the interview. Most of them (42 percent) said the yard goods were to be made into clothing, mainly for children 6-18 years of age and for adults. Those who indicated that they had purchased yard goods for items other than clothing (15 percent) mentioned a variety of articles as intended end products, but curtains or draperies predominated.

A majority of the purchasers of yard goods said they had bought cotton fabrics, whether the intended end products were clothing or items other than clothing. Only three other fabrics--wool, cotton and polyester blend, and all polyester--were mentioned by a sizable proportion of the homemakers. Each of these fabrics was mentioned primarily for clothing end products.

Homemakers who used yard goods for clothing reported that an average of eight clothing items had been made from fabric purchased in the year prior to the interview. Those who bought yard goods for other purposes had made about four items on the average.

Homemakers with larger families, higher family incomes, more education, and those from rural areas were more likely to report the purchase of yard goods. However, fewer respondents from the Northeast section of the country and those 50 years of age and older reported purchasing yard goods.

(Questions 71-79)

## APPENDIX

### Sample Design

The sample was a stratified multistage random sample of all private households in the 48 conterminous States. In each household, the homemaker--the person chiefly responsible for either buying or caring for sheets and other household "linens" for the household--was interviewed. Usable interviews were obtained from 2,489 homemakers.

The structure of the sample, with reference to the first-stage sampling units (FSU's), is indicated by the following table which shows the number of first-stage units in the sample by geographic area and zones.

Geographic region and division	Zone 1	Zone 2	Zone 3	Total
	----- <u>Number</u> -----			
Northeast:				
New England.....	2	2	2	6
Middle Atlantic.....	12	7	5	24
North Central:				
East North Central.....	8	6	6	20
West North Central.....	2	2	6	10
South:				
South Atlantic.....	2	3	7	12
East South Central.....	2	1	4	7
West South Central.....	4	1	4	9
West:				
Mountain.....	2	1	2	5
Pacific.....	6	5	2	13
Total.....	40	28	38	106

The nine geographic areas correspond to the nine census divisions, except that Maryland, Delaware, and Washington, D.C., metropolitan areas were included in the Middle Atlantic division rather than in the South Atlantic. Within each of the nine divisions, three groupings or zones were used as follows:

- Zone 1 -- That portion of a Standard Metropolitan Statistical Area (SMSA) containing one or more cities of 50,000 or more inhabitants.
- Zone 2 -- Portions of SMSA's not included in Zone 1. These consist primarily of suburban communities but may also include rural territory within an SMSA boundary.
- Zone 3 -- Non-SMSA areas consisting of small towns and rural farm and nonfarm territory.

Each zone within each division was further divided, giving a total of 106 strata of approximately equal size. A primary sampling unit (PSU) in Zone 1 was a city or a major subdivision of a city, and in Zones 2 and 3 was a county or noncity portion of a county. All land area in the 48 States was assigned to a PSU, and one PSU was drawn with probability proportional to size from each of the 106 strata. Since the objective was to have each FSU contain approximately 10,000 households, the 106 selected PSU's were divided into area FSU's of approximately 10,000 households. In PSU's involving cities where census tracts exist, such tracts were combined to form FSU's. In nontraced areas, Census Enumeration Districts were combined to form FSU's. From each of the PSU's, one FSU was drawn, again with the probability in proportion to size.

#### Listing of States in Each Region

<u>Northeast</u>	<u>North Central</u>	<u>South</u>	<u>West</u>
Maine	Ohio	North Carolina	Montana
New Hampshire	Michigan	South Carolina	Arizona
Vermont	Indiana	Virginia	Colorado
Massachusetts	Illinois	Georgia	Idaho
Rhode Island	Wisconsin	Florida	Wyoming
Connecticut	Minnesota	West Virginia	Utah
New York	Iowa	Arkansas	Nevada
New Jersey	Missouri	Louisiana	New Mexico
Pennsylvania	North Dakota	Oklahoma	California
Delaware	South Dakota	Texas	Oregon
Maryland	Nebraska	Kentucky	Washington
District of Columbia <u>1/</u>	Kansas	Tennessee	
		Alabama	
		Mississippi	

---

1/ Includes also that part of the Washington, D.C., Standard Metropolitan Area located in Virginia.

#### Identification of Respondents

The 106 FSU's of approximately 10,000 households were divided into segments. A segment is a portion of an enumeration district in nontraced areas and is a block (or blocks) in traced areas. Seven hundred such segments were drawn.

A detailed map of the segments was given to each interviewer after proper instruction and she was asked to list each household in the segment. The lists were returned to the home office of the contractor where they were subsampled and a listing of the sampled households returned to the interviewers. The selection of segments and households within lists was made in such a way as to make the sample self-weighted.

The procedure of prelisting households and drawing the final sample in the office gave the contractor control over the selection of respondent households. Checks were made on the process of listing households.

An eligible household in this study was composed of the occupants of a dwelling unit in which a member of the household was responsible for purchase or care of household "linens." Every sample dwelling unit was contacted and every reasonable attempt was made to determine eligibility of the household and to interview the responsible household member. A differential callback rule based on zone and region was used. This yielded a completion rate of 75 percent of all eligible respondents.

A total of 3,835 prelisted dwelling units was visited to determine eligible households for eventual interviewing. Of this number, 446 were either vacant or no longer standing. Thus, 3,389 occupied households were designated as part of the survey sample. Of this number, 70 were households where no member had responsibility for purchase or care of sheets, blankets, and so on. The remaining 3,315 comprised the eligible group of sample households.

#### Interview completion rates among eligible respondents

Region and zone	Eligible households in survey sample	Completed interviews of eligible households	
		Number	Percent
Region:			
Northeast.....	986	713	72.3
North Central..	951	735	77.3
South.....	864	684	79.2
West.....	518	357	68.9
Zone:			
City.....	1,255	842	67.1
Suburb.....	980	750	76.5
Rural.....	1,084	897	82.7
U.S. total.....	3,319	2,489	75.0

# Sampling Tolerances

Sampling tolerances were determined for the four following items: bedspreads, tablecloths, rugs, and fabric. The computational method used for this determination was Hanson and Horwitz collapsed strata method for the noncertainty PSU's, and the equation given for certainty PSU's.

Item	Coefficient of variation (V)	Ratio using (P)	Standard error of P (S <sub>p</sub> )	Standard error of a random sample
Bedspreads	0.00484	0.959	0.00464	0.00397
Tablecloths	.02003	.7404	.0148	.00879
Rugs	.03270	.5034	.0165	.01000
Fabric	.02709	.4536	.0123	.00996

In the actual computation of the sampling errors, the errors for the certainty strata and the estimates of the noncertainty strata must be computed by different methods. After these are both computed, they are added together.

To aid further in interpreting results, the following table is provided to indicate the approximate magnitude of random error due to sampling:

Approximate sampling tolerances  
(95 in 100 confidence level)

For percentages around --	Number of interviews on which a percentage is based						
	2,489*	2,000	1,000	750	500	200	
	<u>Percent</u>						
50	3	3	4	4	5	8	
40 or 60	3	3	4	4	5	8	
30 or 70	2	3	4	4	5	7	
20 or 80	2	3	3	3	4	6	
10 or 90	2	2	2	3	3	5	

\* Size of total sample.

The chances are approximately 95 in 100 that the survey result does not vary, plus or minus, by more than the indicated amount from the result that would have been obtained had the same procedure been used to interview all homemakers in the population.

For example, 40 percent of all homemakers in the survey said that all cotton sheets keep their whiteness or color a long time. The chances are 95 in 100 that, had all homemakers in the population been interviewed, the true percentage of those saying this about all cotton sheets would be between 37 and 43 percent.

For subgroups of the sample, the possible variation is larger than for the total sample because the number of interviews was smaller. For instance, of the 509 respondents who had less than some high school education, 69 percent indicated that they had not used woven bedspreads. The chances are approximately 95 in 100 that if all homemakers with less than some high school education had been interviewed, between 64 and 74 percent would have been found not to use such bedspreads.

#### Explanation of Tables

Tables are presented in the order of questioning. Generally the wording used in the actual question, probes excluded, is the table heading. Tables are identified by the numbers of the questions on which they are based.

The tabulations are based on the total sample of 2,489 respondents, except where noted. Multiple answers were permitted on some questions. Although counted only once when answers are grouped into a summary category, a respondent may be counted in more than one subcategory within the summary category.

Questions 1, 4, 2, and 6: "...How long ago did you last get any sheets for use in your home -- excluding crib sheets or sheets for youth beds?" "...Any other in the past 12 months?" (Asked only if acquired any sheets in the 12 months prior to interviewing.) "Did you buy them or get them as a gift?"

	: <u>Acquired in past year</u> :				Between 1-3 :	More than :	Don't	
	: Bought: Gift: :				: years ago :	3 years ago :	know	
Cases:	only :	only:	Both:	Total:	:	:	:	
	Number	-----Percent-----						
U.S. total	2489	37	5	4	46	34	19	2

1/ Percentages may not add to 100 because some characteristics were not ascertained for some respondents or because of rounding.

With the exception of check-box material, office record information, and free-answer space, the questionnaire used for this study is reproduced below in entirety. The cards used are reproduced at the end of the questionnaire. Instructions to interviewers and respondents are in upper case letter.

Good \_\_\_\_\_, I am \_\_\_\_\_ of National Analysts, Inc. We are conducting a study for the United States Department of Agriculture all across the country to learn about people's attitudes toward some of the household items available to them. Your household has been selected to be part of this study.

1. We will be discussing household items made of fiber -- such as sheets and tablecloths -- which you have gotten for use in your home. Let's begin with bedroom furnishings -- furnishings for adult use, not for infants or small children. We'll talk first about sheets. How long ago did you last get any sheets for use in your home -- excluding crib sheets or sheets for youth beds?

IF ONE YEAR OR LESS RECORD EXACT WEEKS OR MONTH AND CONTINUE QUESTIONING OTHERWISE SKIP TO QUESTION 9

2. Did you buy them or get them as a gift?

3. How many did you get at that time? ENTER EXACT NUMBER

4. In addition to these sheets, did you get any other sheets in the past 12 months?

5. How long ago did you get these other sheets? ENTER EXACT NUMBER OF MONTHS

6. Did you buy those sheets or get them as a gift?

7. How many did you get at that time? ENTER EXACT NUMBER

8. Then that makes a total of (ENTER EXACT NO. HERE) sheets that you have gotten in the past 12 months? Is that correct?

9. As you may know, sheets are generally made of all cotton or a blend of cotton and a synthetic fiber, such as polyester. Percale and muslin are weaves, not fibers. Either weave can be made of all cotton fiber or a blend. Permanent press -- also called durable press -- is a special finish which is used on a variety of products made of cloth.

This card (HAND RESPONDENT CARD A) lists some different kinds of fibers and finishes used for sheets. Which of these have you used in your home in the past 12 months? Any others?

10. HAND RESPONDENT CARD B This is a scale to help people indicate their opinions. You will notice that the top says "Five -- a very good choice for me" and the bottom says "One -- not a very good choice for me." You can pick any of the numbers from one to five -- the better a choice for you the higher the number you will select. With this in mind, as I mention each kind of sheets, tell me the number that expresses your opinion of how good a choice it would be for you if you were buying sheets now. (Even if you haven't used that kind in your home.)

11. Now we would like to know how important some ideas would be if you were buying sheets. (HAND RESPONDENTS CARD C) We know that all of these ideas may be important, but some are probably more important to you than others. Please tell me which of these ideas would be most important to you if you were buying sheets. Any others?

12. HAND RESPONDENT CARD D This card has some of the phrases on it which we just talked about. We are interested in your opinions about different kinds of sheets, even if you have not used them in your home. Which of these phrases describe your opinions about polyester and cotton blend sheets? Any others? (RECORD COL. A)

13. Which of these describe your opinions about all cotton sheets? Any others? (RECORD COL. B)

14. Which of these describe your opinions about durable or permanent press sheets made of polyester and cotton blend? Any others? (RECORD COL. C)
15. Which of these describe your opinions about durable or permanent press sheets made of all cotton? Any others? (RECORD COL. D)
16. How do you usually care for your sheets? (READ IDEAS TO RESPONDENT) 1. Have them washed and dried at a commercial laundry 2. Wash them in a machine at home or a laundermat 3. Dry them in a machine at home or a laundermat 4. Dry them on a clothesline 5. Dry on line or in machine depending on weather 0. Other (write in)
17. EVERYONE Now I would like to ask you a few questions about blankets. As I mention different kinds of blankets, tell me how good a choice for you each blanket would be if you were buying blankets now. As before, select a number from 1 to 5. (Even if you haven't used that kind in your home.) (HAND RESPONDENT CARD B)
18. HAND RESPONDENT CARD E Let's talk about how important some ideas would be if you were buying blankets. We know that all of these ideas may be important, but some are probably more important to you than others. Please tell me which of these ideas would be most important if you were buying blankets. Any others?
19. HAND RESPONDENT CARD F This card has phrases which some people think are true of different kinds of blankets. Which of these describe your opinions about all wool blankets? Any others? (RECORD IN COL. A)
20. Which of these describe your opinions about all cotton blankets? Any others? (RECORD IN COL. B)
21. Which of these describe your opinions about blankets made of an all synthetic fiber? Any others? (RECORD IN COL. C)
22. Now I'd like to know about the kinds of blankets you use. In the past twelve months did you or did you not use any regular blankets? Electric blankets? Thermal blankets? (RECORD)
23. (FOR EACH "YES" TO Q. 22) What fibers were your (TYPE) made of?  
  
(CIRCLE THE NUMBER) 1. All wool 2. All cotton 3. All synthetic 0. Other (write in)
24. Let's turn now to another household item used in bedrooms -- namely, bedspreads. Have you or have you not used any bedspreads in your home in the past twelve months?  
  
IF NO TO QUESTION 24 SKIP TO QUESTION 33
25. Have you or have you not used chenille or tufted bedspreads in the past twelve months?  
  
IF NO TO QUESTION 25 SKIP TO QUESTION 27
26. What fibers are they made of?  
  
The bedspread industry separates bedspreads into three types. In addition to the tufted or chenille bedspread, a second type is the woven. This type is made of material woven mainly for bedspreads. It is generally heavier and the pattern or color is woven through, not printed on. It has almost the same pattern on both sides except the colors are reversed. All other bedspreads are called tailored. These are made of material that could be used for other items. They may be quilted, flat or ruffled, fitted or not. 27. Have you or have you not used woven bedspreads in the past twelve months?  
  
IF NO TO QUESTION 27 SKIP TO QUESTION 29
28. What fibers are they made of?
29. Have you or have you not used tailored bedspreads in the past twelve months?  
  
IF NO TO QUESTION 29 SKIP TO QUESTION 31
30. What fibers are they made of?

ASK QUESTIONS 31 AND 32 IN SEQUENCE FOR EACH TYPE/FIBER USED IN Q'S 25-30

31. Let's talk about the (type/fiber) bedspread. In your opinion, what are the advantages of such a bedspread? (RECORD IN COL. A)

32. What are the disadvantages of such a bedspread? (RECORD IN COL. B)

33. HAND RESPONDENT CARD B This is the scale we used before. As I mention different kinds of bedspreads, tell me how good a choice for you each bedspread would be if you were buying bedspreads now. Again, select a number from 1 to 5. (Even if you haven't used that kind in your home.)

34. EVERYONE Now I'd like you to think about room-size rugs -- that is, larger than 4' x 6', but NOT wall-to-wall. As I mention some fibers used in room-size rugs for bedrooms, tell me how good a choice for you each would be if you were buying a room-size rug for your bedroom now. As before, select a number from 1 to 5. (Even if you haven't used that kind in your home.) (HAND RESPONDENT CARD B) (RECORD IN COL. A)

35. USING CARD B Now as I mention some fibers used in room-sized rugs -- not wall-to-wall -- for living rooms, tell me how good a choice for you each fiber would be if you were buying room-size rugs for the living room now. As before, select a number from 1-5. (Even if you haven't used that kind in your home) (RECORD IN COL. B)

36. HAND RESPONDENT CARD G Let's talk about how important some ideas would be if you were buying area or room-size rugs for a bedroom. We know that all of these ideas may be important, but some are probably more important to you than others. Please tell me which of these ideas would be most important to you if you were buying area or room-size rugs for a bedroom. Any others? (RECORD IN COL. A)

37. Please tell me which of these ideas would be most important to you if you were buying area or room-size rugs for your living room? Any others? (RECORD IN COL. B)

38. HAND RESPONDENT CARD H This card has some phrases which people think are true of some kinds of rugs. Which of these describe your opinions about room-size all wool rugs? Any others? (RECORD IN COL. A)

39. Which of these describe your opinions about room-size all acrylic rugs (such as Acrilan or Creslan)? Any others? (RECORD IN COL. B)

40. Which of these describe your opinions about room-size all cotton rugs? Any others? (RECORD IN COL. C)

41. Which of these describe your opinions about room-size all nylon rugs? Any others? (RECORD IN COL. D)

42. Have you or have you not used area or room-size rugs -- NOT wall-to-wall --- in any room in your home in the past 12 months?

IF NO TO QUESTION 42 SKIP TO QUESTION 48

43. Let's talk about the room-size rug you purchased most recently. In which room would that be? (CIRCLE THE NUMBER) 1. Living room 2. Dining room 3. Bedroom(s) 4. Den, recreation room 0. Other (write in)

IF GIFT, NEVER PURCHASED SKIP TO QUESTION 48

44. In what year did you buy the rug you purchased most recently?

YEAR: 19\_\_\_\_\_

IF MORE THAN ONE RUG PURCHASED MOST RECENTLY, ASK QUESTIONS 45-47 IN SEQUENCE ABOUT EACH. INDICATE ROOM IN WHICH USED.

45. HAND RESPONDENT CARD I Of what fiber or fibers is it made? (RECORD IN COL. A)

46. What size is it? (RECORD IN COL. B)

47. As far as you can remember, how much did you pay for your (ROOM/FIBER) rug? (RECORD IN COL. C)

48. EVERYONE Let's talk about small rugs, that is, throw or scatter rugs -- rugs which are no larger than 4' x 6'. As I mention different kinds of throw or scatter rugs, tell me how good a choice for you each rug would be if you were buying throw or scatter rugs for your bedroom now. As before, select a number from 1 to 5. (Even if you haven't used that kind in your home.) (HAND RESPONDENT CARD B) (RECORD IN COL. A)

49. Now as I mention different kinds of throw or scatter rugs for the bathroom, please tell me how good a choice for you each rug would be if you were buying throw or scatter rugs for the bathroom now. As before, select a number from 1 to 5. (Even if you haven't used that kind in your home.) (RECORD IN COL. B)

50. Let's talk about cotton scatter or throw rugs for either room. What advantages, if any, are there in using all cotton scatter rugs? Are there any others?

51. And what disadvantages, if any, are there in using all cotton scatter rugs? Are there any others?

52. Have you or have you not used any throw or scatter rugs -- rugs which are no larger than about 4' by 6' in your home in the past 12 months?

IF NO TO QUESTION 52 SKIP TO QUESTION 54

53. In what rooms in your home have you used such rugs? Any others? (CIRCLE AS MANY AS GIVEN) 1. Living room 2. Dining room 3. Living/dining combination 4. Kitchen 5. Bedroom(s) 6. Bathroom(s) 7. Den, recreation room 8. Foyer, hall 9. Other (write in)

EVERYONE Now let's talk about draperies and curtains. Draperies are window hangings which are frequently made of heavier materials, and are generally more "formal." Curtains are less formal window hangings which are unlined, thinner materials and often transparent.

54. In the past 12 months did you or did you not use any draperies in any of your bedrooms? The kitchen? The living room?

IF "DID NOT" TO LIVING ROOM, SKIP TO Q. 56

55. What fibers are the living room draperies you used in the past 12 months made of? I am referring just to the draperies and not the linings.

56. HAND RESPONDENT CARD B As I mention some fibers used in living room draperies, please tell me how good a choice for you each would be if you were buying draperies for your living room now. As before, select a number from 1 to 5. (Even if you haven't used that kind in your home.)

57. EVERYONE In the past 12 months did you or did you not use any curtains in the bedrooms? The kitchen? The living room?

IF "DID NOT" TO LIVING ROOM, SKIP TO Q. 59

58. What fibers are the living room curtains you used in the past 12 months made of?

59. HAND RESPONDENT CARD B As I mention some fibers used in living room curtains, please tell me how good a choice for you each would be if you were buying curtains for your living room now. As before, select a number from 1 to 5. (Even if you haven't used that kind in your home.)

60. EVERYONE In your opinion, what advantages, if any, are there in using all cotton draperies or curtains? (I am referring only to the draperies themselves not to the linings. Are there any others?)

61. And what disadvantages, if any, are there in using all cotton draperies or curtains? Are there any others?

62. Now let's talk about tablecloths. We are interested in tablecloths which are made of cloth -- not plastic, paper, or plastic coated cloth. Have you or have you not used any cloth tablecloths at everyday meals in the past 12 months?
63. EVERYONE Have you or have you not used cloth tablecloths in the past 12 months for special occasions such as holidays or when you have guests for meals?
- IF "HAVE NOT" TO BOTH Q. 62 AND Q. 63, SKIP TO Q. 69
64. Thinking only of the cloth tablecloths -- not plastic -- that you used in the past 12 months, what fibers are they made of? (ENTER IN COL. A)
65. Have any of these tablecloths which you used in the past 12 months had any special finishes which are supposed to make them more convenient to use or haven't they?
- IF "HAVE NOT" TO QUESTION 65 SKIP TO QUESTION 69
66. (FOR EACH FIBER LISTED IN COL. A, ASK:) Do any of your (FIBER) tablecloths have a special finish? (IF "YES") What special finishes do they have -- that is, what are the finishes supposed to do? (RECORD NEXT TO PROPER FIBER IN COL. B)
- (ASK QUESTIONS 67 AND 68 IN SEQUENCE FOR EACH DIFFERENT FIBER/FINISH COMBINATION RECORDED IN QUESTIONS 64 AND 66.)
67. In your opinion, what are the advantages, if any, of a (FIBER/FINISH) tablecloth? (RECORD IN COL. C)
68. What are the disadvantages, if any, of such a tablecloth? (RECORD IN COL. D)
69. HAND RESPONDENT CARD J Let's talk about how important some ideas would be if you were buying tablecloths. As before, we know that all these ideas may be important, but some are probably more important than others to you. Please tell me which of these would be most important if you were buying a tablecloth. Any others?
70. HAND RESPONDENT CARD B As I mention some fibers and finishes used in tablecloths, please tell me how good a choice for you each would be if you were buying tablecloths now. As before, select a number from 1 to 5. (Even if you haven't used that kind in your home.)
71. EVERYONE Let's turn, finally, to yard goods for home sewing. Have you or have you not purchased any yard goods in the past 12 months?
- IF NO IN QUESTION 71 SKIP TO QUESTION 80
72. Was any of this material purchased to be made into clothing?
- IF NO IN QUESTION 72 SKIP TO QUESTION 77
73. IF YES Was any of it to be made into clothing for -- . . . people 19 years old or older? . . . children between 6 and 18 years old? . . . children less than 6 years old?
74. What was the fiber content of the material you bought for clothing?
75. All in all, how many articles of clothing have been made in the past 12 months from material you purchased? (ENTER NUMBER)
76. Was any of this material purchased for items other than clothing?
- IF NO TO QUESTION 76 SKIP TO QUESTION 80
77. (IF "YES" TO Q. 76 OR "NO" TO Q. 72) Was it for -- Bedspreads? Curtains or draperies? Something else? (write in)
78. What was the fiber content of the material you bought for these other items?
79. How many such items have been made in the past 12 months from material you purchased? ,

(IF "YES" TO CURTAINS OR DRAPERIES IN Q. 77, Please count a pair of curtains or draperies as a single item.) (ENTER NUMBER)

#### CLASSIFICATION DATA

80. Thank you. Now when we put together all the things people have told us, we group the answers from people who are alike in one or more ways. In order to know into which groups to put your answers, we need to know something about you and other members of your household.

How many people are there living in this (house) (apartment)? Please include yourself.

81. How many are: Under 6 years old? 6 to 18 years old? 19 years old or more?

82. How old are you?

83. What was the last grade of school you completed? (CIRCLE ONE)

84. Do you own this (house) (apartment) or rent it?

85. HAND RESPONDENT CARD K (income card) And finally, which number shows the group which contains the total household income from all sources BEFORE taxes. Just read me the number.
